- **Upgraded HDMI 2.1:** Adopting the latest HDMI 2.1 interface for data transmission, it enables screen and lighting synchronization, supporting up to 8K at 60Hz and 4K at 144Hz and providing a smooth, high-definition gaming experience.
- **Supports VRR and ALLM:** Reduces lag and screen tearing (i.e., FPS games and some RPGs) with a frame rate exceeding 120Hz.
- **Industry-First AI-Chips:** Deep AI learning from video content to trigger specific and immersive lighting effects.
- **4-in-1 RGBWIC Lighting:** Four-color mixing ensures pure white light and accurate color blending for vibrant effects, making it better suited for game visuals.
- **Upgraded Strip Light:** With 75 LEDs and a brightness of 450 lumens every meter, the high-density light strip provides a brighter and more immersive experience.
