1.Introduction

This document provides operating, maintenance and installation instructions of SDM230 series made by Eastron Electronic Co., Ltd. The SDM230 series measure and display the characteristics of single phase two wire (1p2w) network. The SDM230 series covers 5 models:SDM230-Modbus,SDM230-Pulse,SDM230-Mbus, SDM230-2T and SDM230-Std.

.

The bi-directional measurement makes the meter suitable for import and export energy and power monitoring applications, and also perfect for solar PV measurements. With RS485 Modbus and M-bus port, the meter is easy to remote communicate with other AMR/SCADA systems.
